Make Your Own
Chalk-Style Paint

CHALK-TIQUE®

POWDER ADDITIVE FOR PAINT

- Turns any latex or water-based paint into chalk-style paint
- Gives paint a thick, creamy texture that adheres to any surface, covers easily with minimal prep-work
- Mixes with any color paint, for unlimited possibilities
- Creates a contemporary low-sheen look, or can be easily distressed for an antique, shabby-chic finish
- Use chalk-style paint on wood, glass, ceramic, laminate, metal, fabric, etc.

DARK PASTE WAX

LIGHT PASTE WAX

- The perfect follow-up to any chalk-style painted surface
- Dark Wax shadows details and creates an antique look
- Light Wax seals and protects, leaving a soft luster and rich glow
- Prolongs the life of all chalk-style painted surfaces with carnauba wax and beeswax
- Protects finish color from sun fade with a UV inhibitor

Make Your Own Chalk-Style Paint

PREP: Make sure surface is free from dirt or dust using a damp cloth or Howard Clean-A-Finish.

STEP 1: MIX Chalk-Tique Powder Additive with water according to the ratio chart on jar. Stir until creamy. Add more water or additive until desired consistency is reached.

Pour mixture into your paint and stir until smooth. Chalk-Tique powder additive will not change the color of your paint.

STEP 2: PAINT using either a regular or foam brush. Let dry (average dry time 3 hours). Apply a second coat or touch up if needed. Let dry.

TIP: If you get paint on your carpet or floor, remove it with Howard Clean-A-Finish, water, and a little elbow grease.

STEP 3: DISTRESS (OPTIONAL) by lightly sanding corners and edges with sandpaper. Use coarser grit for a heavily distressed finish or fine grit for a lightly distressed finish.

TIP: WIPE OFF THE SANDING DUST. Run a damp towel over the piece to pick up any dust that you generated with the sandpaper.

FINISH with a coat of Chalk-Tique Dark Paste Wax to slightly darken the finish and to bring out the wood grain in sanded areas. If you prefer less of an aged effect, apply a coat of Light Wax before applying the Dark Wax.

FINISH with a coat of Chalk-Tique Light Paste Wax if you don't want to change the color of the painted piece but still want to add a protective coating.
